TWO 3 DAY FORENSIC DNA LAB COURSES
Spring/Summer 2009
Cost: $1,500

One is specifically for Law Enforcement and the other for Criminal Attorneys

The two separate “hands on” courses will be offered by Dr. Kevin Miller, formerly with the FBI Crime Lab.

Dr. Kevin Miller

The courses are arranged so that each course participant will extract DNA from their cheek cells, develop a DNA profile, interpret the results, and write a report on their findings (previous lab experience is not required, and the point of the course is to continued on next page…

Criminals in Japan use a scam that is now also being practiced in other countries around the world. In the U.S. this has been called the “nephew scam.” They call and convince the elderly that they are a relative in dire straights and ask the victim to transfer money to them. The victim proceeds to an ATM, and then the criminal calls the victim’s cell phone to provide money transfer instructions.

Japanese police have started a nation-wide campaign to inform the public, particularly the elderly, of this scam. In conjunction with this, Japanese police posted a uniformed officer at every ATM nationwide for one day in October. Some ATM users are also greeted by a full sized uniformed police officer made of cardboard who warns them of the scam as they approach the ATM.
FORENSIC DNA LAB COURSE...
give non-scientists a working knowledge of DNA analysis to assist them in their work duties. Dr. Miller can be contacted via email at: kemiller@csufresno.edu

FORENSIC DNA ANALYSIS COURSE
(ON LINE)
Spring 2009

This course is offered in partnership with the Forensic Training Network this coming spring. The course is ideal for professional continuing education, and carries the option of either graduate or continuing education credit. Additional information may be found at

http://www.forensic-training-network.com/cgi-bin/DJcalendar.cgi?TEMPLATE=event.html&EVENTNO=00003

A downloadable course application can be requested by email from Dr. Harald Otto Schweizer: haralds@csufresno.edu

The tuition for this course is $1,300, and full tuition waivers, sponsored by NIJ, are available to those employed full-time in law enforcement/criminal justice agencies. Individuals interested in these tuition waivers may contact the Forensic Training Network directly for details.

Persons not familiar with Fresno State, may be surprised to know that the university has its own DNA lab and Criminology Majors can now also choose a fourth option in

Forensic and Behavioral Science (FBS) within the major. For more information contact Dr. Candice Skrapec via email at: candices@csufresno.edu.

FORENSIC ARCHEOLOGY
CSI meets Indiana Jones
Monday, 1 December 2008
Alice Peters Auditorium
University Business Center

A presentation on Forensic Archeology will be given by Dr. John Pryor, Chair of the Department of Anthropology. The lecture is free and open to the general public. The presentation is sponsored by the Fresno County Archaeological Society, the department of Geography and the department of Anthropology at CSU Fresno.

The Alice Peters Auditorium is located in the University Business Center section of the Peters Business building shown above.
CRIMINOLOGY DEPT. NEWS

POSITION ANNOUNCEMENT CHANGE

With the hiring freeze imposed on the California State University system, the posted opening for Assistant Professor in the Department of Criminology is not being filled until further notice.

Annual Meeting of the American Society of Criminology

Presentations given by Criminology faculty:
Dr. Emma Hughes - "Mirror, Mirror": Reflecting on the Role of Others in Reinforcing Prisoner-Students' Changing Sense of Self

Dr. Jason Kissner - Remediing Logical Inconsistencies in Akers' (1998) and Hirschi’s (2004) Accounts of Self-Control. Akers was in the audience and told Jason that he reminded him of a young Travis Hirschi.

Dr. Bernadette Muscat - Students' Attitudes about Sexual Violence

Dr. Candice Skrapec - The Macdonald Triad: Predictor of Violence or Urban Myth? Candice co-presented with Graduate Student Kori Ryan.

Dr. Barbara Owen -
2) Exploring the Links Between a Female Offender Taxonomy and Pathways Theory (co-presenters were Barbara Bloom and Tim Brennan)

3) Preliminary Findings of "Gendered Violence and Safety: A Contextual Approach to Improving Security in Women's Facilities" (co-presenters were Joycelyn Pollock and James Wells)

Tom Dull - Attended sessions to do research for his upcoming sabbatical.

Tyson DeWitt – (Grad Student) Different Responses to Violence: A Partial Replication

On 8 November 2008, an induction ceremony was held for the new cohort of criminology honor students at the Smittcamp Alumni house on the campus of Fresno State. The ceremony was attended by the honor students and their family and friends.

Faculty members of the honors program committee were also there to greet and mingle with the attendees.

Continued on page 4
Criminology Honors program continued…

Dr. Dull, the program coordinator, Dr. Luz Gonzalez, the Dean of the College of Social Sciences, and Dr. Ruth Masters, the chair of the Criminology department, gave short speeches in which they lauded the academic and personal achievements of this new group.

Dr. Gonzalez  Dr. Masters

The inductees were introduced by honor students from the prior cohort and all received a formal certificate signifying their status as criminology honor students.

THE CRIMINOLOGY NEWSLETTER

New logos and graphics are continually being developed by the author to improve the appearance or attractiveness of this newsletter. While criminology journals typically abhor anything in color (helps to make them more boring), the focus of this newsletter is both to inform, educate and intelligently entertain.

Criminology Newsletter in German

On 15 November 2008, the first Fresno State German language criminology newsletter was published and distributed by Dr. Schweizer. This German newsletter contains some of the same information as the English version and additionally carries articles or information that is of particular interest and use to German police. The newsletter is the result of Dr. Schweizer’s presentations to German police in June 2008 and the subsequent collaboration with Peter Herwig, a police official and president of the Karlsruhe section of the International Police Association (IPA), which is co-sponsoring the German language newsletter. The newsletter will be distributed to IPA members and German police in general. Below is a screen shot of the cover page of the German newsletter:
CRIMINOLOGY ADVISORY BOARD

The Advisory Board met at the University Restaurant on 16 October 2008. Some of the board members included retired Sheriff Steve Magarian, the current Sheriff Margaret Mims, Undersheriff Scott Jones, and District Attorney Elizabeth Egan.

CRIM 108 FRESNO POLICE INTERNSHIP

SGT Dooley reported that the program’s first three Crim 108 students were sworn in as Level III Reserve Officers. The students were identified as Michael Bischel, Rebecca Buckner, and Garrett Holliman.

The California Penal Code authorizes Level III Reserve Officers to perform limited duties, to include such tasks as prisoner transport and prisoner security. To reach and pass this level, students had to pass tests required by California POST (Peace Officers Standards and Training), firearms, baton, arrest and control, etc.

Reaching this level also means that they passed a rigorous physical fitness test, background investigation, polygraph and medical exam. These students now go on to complete level II training and if they complete it successfully, the Fresno Police Department will sponsor them through Level I training, and after successful completion, they will be hired as full time officers and enter field training.

Above: Dean L. Gonzalez addressing the Board members.

Above: Criminology Dept. Faculty, Steve Walker, the associate Dean, and Sheriff’s CPT Jose Flores. Also present were student and faculty from the Fresno State Mock Trial Club which has developed a national reputation.

Students being sworn in as Level III officers by Fresno City Clerk Becky Klisch.
HACK PROOF COMPUTER NETWORK (LAN) COMMUNICATION

A team of European scientists in Vienna, Austria, developed a new approach to making computer network based communication hack proof. This new mechanism, however, does not use conventional encryption technology, but photons. The data is carried in a light wave through fiber optic cable. Any intrusion automatically modifies the physical characteristics of the photons and would be detected immediately.

The system is undergoing further development, since the transmission speed is very slow and the quality of the photons deteriorates rapidly with distances longer than 100 km of fiber optic cable. The technology is already being used for internal communication not involving great distances and promises to be very useful for banks, government ministries, and other organizations needing a high level of security for their communications.

Frankfurt am Main, Germany: Attendees at the international book fair in October noticed the presence of a wireless internet provider with the name Hisbollah (Hizbollah). There was no public access to the server and Hisbollah was using the latest encryption technology.

EMPLOYMENT NEWS

LAS VEGAS METROPOLITAN POLICE DEPT.

Las Vegas “Metro” is currently recruiting both police and correctional officers. In order to assist new employees, the department has implemented a H.I.R.E. Program (Household Inclusion Recruitment and Employment) which provides family guidance, housing assistance (finding temporary or permanent housing), local activities, and social interaction.
